

Sub-Array PRS003

2021 Operation & Maintenance Documents

Project Name: PRS003 – West Garage

Project Location: 2 South Dr Princeton, NJ 08540

Project Capacity: 600 kWAC

System Summary:

The 831.84 kW(DC)/600 kW(AC) PRS003 photovoltaic (PV) array is located on the roof of the West Parking Garage, on South Dr in Princeton Twp, New Jersey. The PV system is comprised of 2144 JA Solar PV modules, with 1,504 rated at 385W and 640 rated at 395W and associated structural carport racking by Parasol. The PRS003 system includes (3) 1000V fused string input Panelboards, six (10) Chint Power Systems CPS SCA60KTL-DO/US-480 string inverters: One (1000A Switchboard, and One (1) medium voltage transformer: (1) 500kVA Eaton Transformer. The PV system connects to the grid via the 5kV switchgear located in the Elm Dr substation area.
