

Sub-Array WWS002

2021 Operation & Maintenance Documents

Project Name: WWS002 – Washington Road A

Project Location: 300 Washington Road, West Windsor, NJ 08540

Project Capacity: 5,000kWAC

System Summary:

The 5.9 MW(DC)/5MW(AC) WWS002 photovoltaic (PV) array is located on Princeton University's Block 4, Lot 1.011 near Washington Road and Route 1 in West Windsor, New Jersey. The PV system is comprised of 15,552 Canadian Solar PV modules, each rated at 380W and associated structural support racking by RBI Solar Mounting Systems. The WWS002 system includes (26) 1500V fused string input combiner boxes, two (2) centralized inverters: (1) Power Electronic HEMK FS2125KU Centralized Inverter and (1) Power Electronic HEMK FS3190KU Centralized Inverter, two (2) medium voltage transformers: (1) 2MVA Eaton Transformer and (1) 3MVA Eaton Transformer, and a 26.4kV Square D Metal Enclosed Switchgear equipped with (3) integrated energy revenue grade meters. The PV system connects to the grid via the 26.4kV switchgear.
