

Sub-Array WWS003

2021 Operation & Maintenance Documents

Project Name: WWS003 – Washington Road B

Project Location: 301 Washington Road, West Windsor, NJ 08540

Project Capacity: 3,000kWAC

System Summary:

The 3.16 MW(DC)/3 MW(AC) WWS003 photovoltaic (PV) array is located on Princeton University's Block 3, Lot 1.0113 near Washington Road and Route 1 in West Windsor, New Jersey. The system is comprised of 8,316 Canadian Solar PV modules, each rated at 380W and associated structural support racking by RBI Solar Mounting Systems. The major equipment in the system includes (14) 1,500V fused string input combiner boxes, one (1) Power Electronic HEMK FS3190KU Centralized Inverter, a 2900kVA Eaton Transformer, and a 26.4kV Square D Metal Enclosed Switchgear equipped with (3) integrated energy revenue grade meters (Same PV switchgear as WWS002). The WWS003 system connects to the grid via the 26.4kV switchgear.
